Subject: Walmart banking...

Wal-mart is one of the largest business enterprises in the entire world! It has already done irreparable damage to millions of "mom & pop" business. It shows blatant disregard for the well being of it's workers by not providing them health benefits or even a living wage while the people at the top continue to make millions of dollars. In the meantime, we, the taxpayers, subsidize the wages of same workers in the form food stamps and Medicaid. Wal-mart has repeatedly lied about intents and plans in various venues.

Please, don't even consider giving this unethical business the additional power to run smaller banking institutions out of business!! Wal-mart has no business in banking!!

Thank you for your time.
